

THÔNG NGUYỄN

SOFTWARE ENGINEER

+84 988 195 159

thong.nguyencao.vn@gmail.com

Have learned something new everyday since 1995

EXPERIENCES

Employment	Full Stack Engineer
Hero 2023 - 2026	- Built InstaPay, an Earned Wage Access product giving employees on-demand access to wages before payday. - Developed HeroClear, an embedded superannuation clearing house automating Payday Super compliance via NPP/PayTo rails. - Delivered mobile experiences with React Native and web portals with React + GraphQL. AI is the new deal. Engineers never stop learning — but now we learn faster to control AI.
ZaloPay 2021 - 2023	React Native Engineer - Lead the front end group of the Finance Services team. - We thrived although got locked with an old version of the framework. Prefer strong company culture over processes, and promote "less is more" spirit.
Infina 2020 - 2021	React Native Engineer - Build the Infina mobile app. - Develop a strong team of React Native developers. - Maintain team processes to efficiently work under pressure. Chaos is better managed than being taken as an excuse.
Minito 2018 - 2020	React Engineer - Participate in the conceptual design of the Minito system. - Develop the web app with React. - Consulted the client on applying Agile methodologies. We will always know if something can be done or not.
RealStake 2018 - 2020	React Engineer - Maintained the web app of RealStake using React. - Worked with the product team to assess technical feasibility. - Consulted on applying Extreme Programming to the client's team in order to deliver within tight deadline while still keep the developers happy. A friendly and professional working environment has huge benefit on both personal and business development.

Swememo

2016 - 2018

Full Stack Engineer

- Lead the development of Swememo's web application.
- Built and maintained a **Ruby on Rails** team.
- Learned various skills related to a product's lifecycle.

Together we brought Swememo to Echelon Asia Summit 2018 in Singapore.⁽¹⁾

East Agile

2016

Full Stack Engineer

- Developed a client projects under supervision of one of EA's project managers.
- Learned **TDD, BDD, Extreme Programming** and started my career with **Ruby on Rails**.

Testing is a must, or we actually don't care at all about our product.

EDUCATION, TRAINING & AWARD

FPT University

2018

FPT's Android Application Programming Contest - First Prize

2016

Vietnam Olympiad in Informatics - Bronze Medal

2013
